**) *For Online Exam, this is the due date*
***) *Only for Onsite Exam*
****) *Onsite Exam Type should be Independent*

AI Use Type

Types	Descriptions	Sample Use
Integrated	AI use is part of the grading rubric and must be used according to the lecturer's instructions. The type of AI, usage stages, and assessed aspects must be explicitly stated in the task description. Students may not use AI applications other than those required and must submit a declaration form.	AI-based final project, e.g., creating prompts, AI ethics evaluation, recommendation systems.
Partial	Students may use AI for up to 50% of the work process, including structure, idea development, or visualization. Usage must follow the course guidelines. Students must submit an AI use declaration form.	Video production, reflective vlog, exploratory essay, design work, final project.
Flexible	AI use in task creation is not regulated because it does not affect the assessed aspects of the task. If AI is used, students must submit a declaration.	Oral exams, venture pitching, class discussions, debates.
Limited	AI may only be used in the early stages (e.g., brainstorming or outlining) but not in final content writing or conclusions. Example: brainstorming topic ideas but not writing the final version. Students must submit an AI use declaration form.	Proposal writing, prototype-generating projects.
Independent	Students must complete the task without any AI assistance. All work must be entirely original. No declaration is required because AI use is strictly prohibited. Violations will be treated as academic integrity breaches.	Written exams.

Please insert the test paper into the examination booklet and submit both papers after the test.*

The penalty for CHEATING is DROP OUT!

Learning Outcome for

LO1: Explain the fundamental concepts and advantages of React Native for hybrid application development
LO2: Apply cross-platform mobile applications using React Native
LO3: Analyze user requirements and technical specifications to guide the development of a hybrid mobile application

I. Studi Kasus (100%)

1. **[LO 1, LO 2, LO3 –100 Points]** Buatlah sebuah aplikasi mobile menggunakan React Native dengan memilih satu tema berikut: Education, Transportation, Finance, Services, atau Health. Aplikasi merupakan prototipe: seluruh data bersifat statis dan autentikasi belum diimplementasikan.

   Aplikasi (minimal 4 layar)

   a. **[LO 2 – 10 Points]** Autentikasi (Register & Login): layar pertama aplikasi; Register dan Login dihitung satu layar. Cukup tampilan dengan validasi input sederhana, lalu mengarahkan ke halaman utama.
   b. **[LO 2 – 20 Points]** Halaman Utama / Daftar. Data / item list memuat gambar atau ikon, judul yang dapat di navigasi.
   c. **[LO 2 – 15 Points]** Halaman Detail: dibuka dari item daftar atau action dari Halaman Utama, menampilkan informasi lengkap.
   d. **[LO 2 – 15 Points]** Halaman Fitur Pendukung: satu layar lain yang relevan.
   e. **[LO 2 – 10 Points]** Kualitas Kode: functional component dengan Hooks, minimal 3 komponen reusable, data statis di berkas terpisah, aplikasi berjalan tanpa error.

   Dokumen dan video

   f. **[LO 1 – 5 Points]** Penjelasan Konsep: di README, 300–500 kata. Jelaskan cara kerja React Native, minimal 3 keunggulannya untuk aplikasi hybrid, serta komponen, props, state, dan navigasi dengan contoh kode sendiri.
   g. **[LO 1 – 5 Points]** Video Demo: 3–5 menit. Peragakan semua layar, lalu jelaskan secara lisan konsep React Native yang dipakai sambil menunjukkan kode.
   h. **[LO 3 – 10 Points]** Analisis Kebutuhan: di README. Tuliskan masalah, target pengguna, minimal 5 kebutuhan pengguna, tabel pemetaan kebutuhan ke layar dan komponen, serta alasan keputusan desain dan rencana pengembangan.
   i. **[LO 3 – 10 Points]** Bukti Penggunaan AI: berkas AI_USAGE.md (Log bantuan AI atau historynya serta bukti screenshotnya)

   Ketentuan pengumpulan (wajib):
   Jawaban hanya dinilai jika keempat berkas berikut dikumpulkan lengkap.

   - **Kode sumber**: tautan repositori GitHub dengan minimal 10 commit di minimal 3 hari berbeda, bukan satu commit saja. Menjadi dasar penilaian spesifikasi 1–4 dan spesifikasi teknis (LO 2).
   - **README.md**: identitas, tema, tangkapan layar, cara menjalankan, jawaban soal 6 dan 8, serta tautan video demo
   - **AI_USAGE.md** jawaban soa 9 **dan AI Declaration Form**

BINUS UNIVERSITY
ARTIFICIAL INTELLIGENCE USE DECLARATION FORM

I/We* hereby:

Name	: ABDULLAH MUDZAKIR
Student ID	: 2702334512
Course Code	: COMP6923051
Course Title	: Hybrid Application Development
Assignment Title	Mid Exam
Assignment Type	Partial

Declare that I/we* have/have not* used AI in the completion and preparation of the assignment listed above.

If Yes, the AI tools used are as follows:

ASSIGNMENT PART	USED AI TOOL?	TOOL(S) USED	KEY PROMPT
Idea and content discussion	~~Yes~~/No		
Text/Script generation	Yes/~~No~~	CLAUDE	Buatkan teks penjelasan cara kerja React Native 300-500 kata untuk README
Image/Video/Graphics generation	Yes/~~No~~	Stitch Google	buatkan carental aplikasi untuk rental kendaraan minimal 4 page 1page login register, 1 page home dan 2nya sesuai dengan kebutuhan.
Translation, grammar, and spelling check	Yes/~~No~~	CLAUDE	Buatkan saya content writing websitenya
Others……..	Yes/No		
Approximate contribution of AI in the final submission of assignment is ……30.%			

I/We* also declare that any use of AI/artificial intelligence for the course mentioned above has been disclosed in this letter.
